Subject: Application for an Architecture Traineeship

Dear Sir or Madam,

I am writing to apply for the two-year architecture traineeship. I recently graduated with High Distinction in Architectural Engineering from the Brussels Faculty of Engineering, where my studies were conducted in English. I am eager to gain hands-on experience in all facets of architectural design and deepen my professional knowledge through this traineeship.

My academic background emphasized both sustainability and engineering, providing me with a strong foundation in engineering calculations, parametric design, bioclimatic architecture, sustainable materials, history, and architectural projects. I believe that this extra knowledge in engineering is very beneficial to better understand and optimize the techniques behind a project. The title of my master thesis was: "Civil Engineering History and Heritage in Belgium: Focus on Innovation and Aesthetics (1959-2024)", and it enabled me to gain knowledge on important construction techniques and structures (for both bridges and buildings) in Belgium. It dealt with heritage, preservation techniques, innovation and aesthetics.

During my studies, I worked on diverse projects, dealing with different scales and programs, ranging from a small-scale museum in a park to a masterplan in the Leopold district. As highlighted in my portfolio, I also had the opportunity to work with parametric tools to design an easily installable greenhouse and led a team on another project, which helped me develop leadership skills.

I am curious, creative, eager to learn, and very attentive to details. I am impatient to apply my academic knowledge, creativity, and passion for sustainable design in a practical setting. Flexible and mobile, I am available for any additional information or interviews.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to your team.

Yours sincerely,

Célia Fabry
